User journey by the Design Team of Accenture Interactive NL

Difficulty
Beginner

Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users. \triangleright

O Phases High-level steps your user needs to accomplish from start to finish	installation phase	Data entry phase	Request phase	Response phase
2 Steps Detailed actions your user has to perform	The identify specific pollutants and source of pollution	To determine the chemical constituents are monitor properly.	To screen for impariment	Cost of available monotoring equipmentt
3 Feelings What your user might be thinking and feeling at the moment	It is possible to acheive power efficient water quality parameter.	The reason for happening data entry phase is for puplic and the purpose of administration.	Low power WiFi device.	The project develop an efficient,cost- effective,real time river water quality monitoring system
	Sensors are quality makes costlier serious health issues.	With the help of web information.	Wimax network to monitor quality of water from larger distance in real time.	To monitor Physical and chemical parameter
